

Fernbrook Bio

Fernbrook Bio

Website designed to include Content Management Solution to enable Stuart McCurry to manage and update the website themselves.
Creating enough power to heat 2000 homes

At Fernbrook Bio, we're passionate about creating something positive amount of waste this country generates.

We find it shocking that over 40% of the UKs food waste is simply dumped in landfill sites, when it has the potential to create clean, green energy to power our businesses and homes. So, in 2008 we set about changing that.
