

British Felt Website

E-commerce Website for felt products.

We had done a few website for British felt over the years and they have had a huge success with the revenues they have gained by selling online. This website provides them with the flexibility they need to show products with all sorts of options, allowing their customers to choose exactly the product they need. If you'd like a managed service instead we also offer to do all your updating for you, leaving you to process the orders.

The site was also translated by Narkedesign into French, German and Italian.

Website: www.britishfelt.com
